AYER'S Sarsaparilla

Scrofula and Scrofulous Affections, such as Tumors, Ulcers, Sores, Eruptions, Pimples, Pustules, Blotches, Boils, Blains, and all Skin Diseases.

Blains, and all Skin Diseases.

J. C. Aren & Co. Gents: I feel it my duty to acknowledge what your Saraparilla has done for me. Having inherited a Scrofulous infection, I have suffered from it in various ways for years. Semetimes it burst out in Ulcers on my lands and arms; sometimes it turned inward and distressed me at the stomach. Two years ago it broke out on my head and covered my scalp and ears with one sore, which was painful and leathsome beyond description. I tried many medicines and several physicians, but without much relief from any thing. In fact, the disorder grow worse. At length I was rejoiced to read in the Gospel Messenger that you had prepared an aiterative (Saraparille), for I knew from your reputation that any thing you made must be good. I sent to Cineinnati and got it, and used it till it cured me. I took it, as you advise, in small doses of a tenspoonful over a month, and used almost three bottles. New and healthy skin soon began to form under the scab, wife, after a while fell off. My skin is now clear, and I know by my feelings that the disease has gone from my system. You can well believe that I feel what I am saying when I tell you, that I hold you to be one of the apostles of the age, and remain ever gratefully.

Our physician thought nothing but extirpation could afford relief, but he advised the trial of your Sarsaparlila as the last resort before cutting, and it proved effectual. New Oblems, 25th August, 1859.

Dr. J. C. Ater.: Sir, I cheerfully comply with the request of your agent, and report by your some of the effects I have realised with your Surreparilla.

I have cured with it, in my practice, most of the complaints for which it is recommended, and have found its effects truly wonderful in the cure of Feneral and Mercarial Disease. One of my patients had Syphilitic ulcers in his throat, which were consuming his palate and the top of his mouth. Your Sarsaparilla, steadily taken, cured him in five weeks. Another was attacked by secondary symptoms in his nose, and the ulceration had eaten away a considerable part of it, so that I believe the disorder would soon reach his bealn and kill him. But it yielded to my administration of your Sarsaparilla; the ulcera healed, and he is well again, not of course without some disfiguration to his face. A woman who had been treated for the same disorder by mercury was suffering from this poison in her bones. They had become so sonsitive to the weather that on a damp day she suffered excruciating pain in her joints and bones. She too, was cured entirely by your Sarsaparilla in a face. A cecks. I know from its formula, which your agent gave me, that this Preparation from your laboratory must be a great remedy; consequently, these truly remarkable results with it have not surprised me.

Fraternally yours,

Dr. J. C. Aten: Sir, I have been afflicted with a painful chronic Resumetism for a long time, which saffled the skill of physicians, and stuck to me in spite of all the remedies I could find, until I tried your Samaparilla. One bottle cured me in two weeks, and restored my general health so much that I am far better than before I was attacked. I think if a wonderful medicine. J. FREAM. attacked. I think it a wonderful medicine. J. FIBAM.

Julis Y. Getchell, of St. tgouis, writes: "I have been afflicted for years with an affection of the Liver, which destroyed my health. I treed every thing, and every thing allied to relieve me; and I have been a brothen-down man for some years from no other cause than derangement of the Liver. My beloved partic, the leve Mr. Empy, advised me to try your Sarsaparilla, because he said he knew you, and any thing you made was worth trying. By the bleesing of God it has cured me, and has so purified my blood as to make a new man of me. I feel young again. The best that can be said of you is not half good enough."

Schirrus, Cancer Tumors, Enlargement, Ulceration, Carles and Exfoliation of the Boucs. A great variety or uses have been reported to us where cures of these formidable complaints have resulted from the use of this remedy, but our space here will not admir them. Some of them may be forms in our American Almanne, which the agents below named are pleased to furnish gratis to all who call for them.

Dyspepsia, Heart Discase, Fits, Epilepsy, Melancholy, Neuralgia.

Many remarkable cures of these affections have been made by the alterative power of this medicine. It stimulates the vital functions into vigorous action, and thus overcomes disorders which would be supposed beyond its reach. Such a remedy has long been required by the necessities of the people, and we are confident that this will do for them all that medicine can do.

of the Disease.

This is a remedy so universally known to surpass any other for the cure of throat and lung complaints, that it is useless here to publish the evidence of its virtues. Its univalled excellence for coughs and colds, and its truly wonderful cures of pulmonary disease, have made it known throughout the civilized nations of the earth. Few are the communities, or even families, among them who have not some personal experience of its effects—some living trophy in their midst of its victory over the subtle and dangerous disorders of the throat and lungs. As all know the dreadful fatality of these disorders, and as they know, too, the effects of this remedy, we need not do more than to assure them that it has now all the virtues that it did have when making the cures which have won so strongly upon the confidence of manking.

our trophics are whole batteries and thousands of small arms and prisoners.

PHILADELPHIA. Sept. 18.—A special dispatch dated Hagerstown yesterday, to the Press, says of the fight on Tuesday:

The battle raged with great spirit. The firing on either side was very heavy until toward sundawn, when the rebels were flanked by Hooker and Porter and severely punished. Their fire became desultory, and it was evident their ammunition was giving out.

This morning the battle was renewed by the enemy with increased vigor. They acted as if they had been reinforced and furnished with fresh anamunition. The battle lasted till four prolects this afternoon, when the rebels retreated, leaving Longstreet and the remnant of his division in our hands as prisoners. The entire rebel army will be captured or killed. There

Mebbl Estimate of Gem. Pope
An officer in our army sends us from the Pen insula a copy of the Richm and Examiner of Sept. 6, in which we find the following leading article:

"A painful rumer throws a gloom over the spirit of the Southern public in the hour of victory. It is feared Gen Pope has been mortally wounded. We sincerely hope that this disaster of the least foundation in truth; indeed, it is so improbable that this mobile friend of the South should have got with in the reach of a bullet, we may still flatter ourselves that his services will long be enjoyed that the southern Confederacy. It is our earnest prayer that God may protect that precionalife; that He may protect hat the members of that vision in our hands as prisoners. The entire rebel army will be captured or killed. There

was no chance left for them to cross the Potomac, as the river was rising and our troops are pushing them continually and sending prisoners to the rear.

It is reported here that Miles enacted his Bull Run scene at Harper's Ferry, which was surrendered to the rebels in a shameful manner.

Six batteries of artillery belonging to Long-atreet's division were captured yesterday and tosurrendered to the reverse in the state of the reverse in the state of the command of Pope. Lincoln's estimate of Pope, it is said, is 'great brains, great indolence and great unversoity;' but an associate in the old army has characterized him more simply as 'the biggest fool, the most arrant coward and the biggest liar that ever disgrated epanders.

with other distinguished officers will be forced to surrender within a day or two at farthest.

Our immense army is in motion, and our generals certain of ultimate and decisive sucstrous principles he commenced it, and what orders he issued, are still fresh-in the public

Supplies for our army are coming by way of Harrisburg and Baltimore.

Burnside has retaken possession of Harper's Ferry, and is advancing on a special mission with his corps.

WATERTOWN, Sept. 18—The following private dispatch from Gen. Hooker we are allowed to make public:

CENTERVILLE, MD, Sept. 17.

CENTERVILLE, MD, Sept. 17.

A great battle has been fought, and we were victorious. I had the honor to open it yesterday afternoon, and continued it till ten o'clock this morning, when I was wounded and compelled to quit the field. It was fought with great violence on both sides, and the carnage has been awful. I only regret that I was not permitted to take part in the operations until they were concluded, for I had counted on either capturing their army or driving it into the Potomac.

My wound has been painful, but is not one that will be likely to lay me up. I was shot through the foot.

"With such notes as these commenced the share lark in the cap." No event has been more auspicious for the South than the accession of Pope to the command of the Yankee armies, and there is scarcely any loss which we could support with greater difficulty than his death would occasion. Let us trust that the Goddess of Cowardice enveloped him in a cloud like one of Homer's heroes, and bore him to a place of eafety, so far ahead of his him to a place of eafety, so far ahead of his flying followers, that he has been reported dead: only because he has not yet been overtaken.
